Stand B8

EPAM is a global leader in AI transformation engineering and integrated consulting, serving Forbes Global 2000 companies and ambitious startups. With over thirty years of expertise in custom software, product and platform engineering, EPAM empowers organizations to become AI-native enterprises, driving measurable value from innovation and digital investments.

Recognized by industry benchmarks and leading analysts as a leader in AI, EPAM delivers globally while engaging locally, making the future real for clients, partners and employees.

At EPAM, our team consists of seasoned professionals with in-depth knowledge and expertise in KX products and kdb+ development. We work closely with our partner KX to stay on the forefront of innovation and training, ensuring that we deliver the best possible solutions to your project.

Through First Derivative, we have the largest team of KX and kdb+ professionals in the industry, with onsite expertise available in select metro centers or service from our local offices all over the world.

B2BITS is a leading provider of solutions and consulting services to the capital markets, with products, reusable frameworks, components for trading and operations in all asset classes, including FIX engines, FIX servers, FIX log analyzers, OMS, matching engines and market data-feed adaptors.

FIRST DERIVATIVE

AN EPAM COMPANY

CDM Integration Accelerator for DRR Readiness

Accelerate the journey from live FIX or XML trade messages to FINOS CDM and ISDA DRR ready regulatory reporting without re-platforming your existing trade capture infrastructure.

Key Benefits

- **Accelerate proof-of-concept delivery** and shorten time to value
- **Simplify end-to-end data integration** from source to reporting output
- **Empower business analysts** to manage workflows independently, reducing operational bottlenecks
- **Reduce developer effort and dependency** through configuration-led implementation
- **Improve long-term maintainability** and consistency across all reporting flows
- **Strengthen internal risk controls** to significantly improve final output quality
- **Enable future-proof integration** across new or updated regulatory regimes and sources
- **Support stronger business-case development** with measurable outcomes

Why First Reporting?

- **Provides a user-friendly environment** for collaborative mapping and integration across business and technical teams
- **Automates data flattening** to dramatically reduce manual transformation steps
- **Delivers configurable, reusable mappings** across asset classes, products, and regimes
- **Includes a robust testing and validation framework** for absolute confidence at scale
- **Uses an extensible architecture** designed to easily adapt to evolving technical requirements
- **Offers an AI-assisted roadmap** to further improve productivity and accuracy
